## INSTALLATION SERVICE

**ARMCO® Barriers** are the only manufacturer to offer an 'in-house' trained **Installation service** for its own product. That is because we understand that the way that it is installed, greatly affects the performance of any barrier system.

- Using our pneumatic post ramming technology we provide a more rapid and efficient system providing our clients with cost savings as well as peace of mind. Up to 4 times faster than conventional ramming.
- The **ARMCO® Barriers Installation Service** is the most professional in the market, factory trained to ensure that **ARMCO® Guardrail and protection systems** are installed to meet all State Road Authority Standards.
- **ARMCO® Barriers'** installation crews have thorough product knowledge from manufacture to the final installation.
- Our installation teams are uniformed and arrive in identifiable and fully equipped company vehicles.
- All electrical equipment is tagged as per Australian Standards and Occupational Health & Safety practices.
- All machinery is fitted with Reverse Signals and Flashing lights
- Machinery and vehicles contain basic safety equipment such as First Aid kits and fire fighting equipment.
- All OH&S Procedures in place.
- Public Liability Insurance and Work Cover Insurance current. Documents can be provided.
- All crew supervisors are in direct contact with the designer or sales person relevant to that job and operate with sophisticated communication and IT technology to ensure that each job progresses without concern.
